

# Continued Professional Development

## Fundamentals of Auditing

### Know the future of Auditing

Have you ever wondered why your auditor has requested certain information? Pieter Steyn will discuss the traditional audit approach and touch on how companies and auditors can help each other to deliver valuable insights to their stakeholders.

Today like never before, technology is driving many changes in how we all live, work and interact and it is critical that the audit profession keeps pace with this change and is proactive in understanding how new technology trends can transform the audit approach. Pieter will discuss how technologies like data analytics, artificial intelligence, block chain and robotic process automation are impacting the auditing environment

These sessions will also cover the basics of who needs to be audited and more importantly why companies or projects need to be audited.

Pieter is a Director in the KPMG PNG Audit Practice and has over 12 years experience across PNG, Australia and Africa providing audit and advisory services to a variety of clients ranging from large listed multinational organisations to small private businesses. Pieter has experience across a variety of sectors including financial services and funds management, energy and resources, manufacturing, property construction, development and investment, NGO's, state owned enterprises and government agencies.

Pieter Steyn, CPA PNG, CA (SA)
